

WAXING

POST CARE

Please note: some slight soreness, small bumps and redness are common and perfectly normal temporary reactions, particularly if this is your first wax.

These symptoms should subside over the next 48 - 24 hours. If you experience persistent redness or irritation, or if you have any questions, please do not hesitate to contact us.

Keep the waxed area clean, and avoid heat and friction during the next 24 - 48 hours.

- No hot baths or showers (cool to lukewarm water only).
- No saunas, hot tubs, massage or steam treatments directly after.
- No tanning (sunbathing, sun beds or fake tans).
- Avoid scratching or touching the treated area with unwashed hands.
- Wear clean, loose fitting clothes.
- Avoid swimming in chlorinated pools.
- Do not apply deodorants, body sprays, powders, lotions or other products to areas other than those recommended by your therapist.

After you've bathed/showered, apply a soothing lotion to the waxed area. Moisturise every day to keep the skin supple and help new hairs to grow through normally. Don't exfoliate too much or too rough as this can graze the skin and cause ingrown hairs.

Please do not shave between your appointments.

If you have any question or unexpected concerns, please call 16010999
